

Everything You Need to Know about Open Source

Save Money, Build Intellectual Property, Decrease Time to Market

Join the MIT Enterprise Forum DFW in an exploration of the bewildering world of Open Source. Leading industry experts will discuss the intricacies of open source licenses, using open source for daily office work, and the future of cloud computing. Learn why you may never have to buy software again.

Presenters

Steven Thrasher: Steven is an intellectual property attorney who helps businesses, particularly start-ups and early-stage companies, identify and map intellectual assets, craft licenses, and deal with litigation related to intellectual property. Steven received M.B.A. & J.D. degrees from Baylor, and degrees in Electrical Engineering & Finance from Auburn.

Nick Lawrence: Nick is a computer scientist and entrepreneur who has founded seven companies, holds many patents, and has conducted nearly a score of Federal R&D projects. He took his undergraduate degree at MIT in EE/CS and his PhD at UT Austin in Computer Engineering.

Paul Stedman: Paul is a recognized leader in the Software Professional Services industry with over 25 years of Strategy, Sales, Leadership, Operations and Service Delivery experience. He holds an MBA from MIT's prestigious Sloan School of Management with select studies at the Harvard Business School. He oversees cloud computing strategy at Solutions to Order, which he co-founded.
